

Youth

This 4-day training session teaches future flyers about flight fundamentals, safety, navigation, teamwork, flight planning and communications. Participants will get firsthand instruction with our experienced flight instructors and log time on our flight simulator and in the cockpit of our aircraft. The camp will be capped off by a flight with one of the instructors. This camp will stimulate your child in math, science, physics, and provide a taste of what aviation is all about.

Flight Camps

Advanced Camp

Tailored toward those who have already completed our beginner camp, or youth who are especially interested in pursuing a private pilot's license, this camp provides in-depth exposure to ground school, following a syllabus. It includes 12 hours of classroom instruction and a 3-hour flight with an instructor.
